

Yeastar Cloud PBX incorporates a powerful Yeastar Management Plane (YMP) and easy to deploy dedicated PBX instances for solution providers and telecom resellers to easily start their hosted PBX business.

- Build up Your Private-branded Cloud PBX
- Manage and Create PBX Centrally in YMP
- Expand Instance Capacity Flexibly and Easily
- Stay Connected With Linkus Mobile Client
- Enjoy the Rich Features of S-Series PBX in the Cloud

It's downright easy

With Yeastar Management Plane (YMP), a robust, scalable, and energy-efficient communication services platform for central management, you can say goodbye to the overwhelming workload of separate instance installation and management. Realize rapid deployment, real-time management, enhanced security mechanisms, and many many more, in one single simple centralized platform.

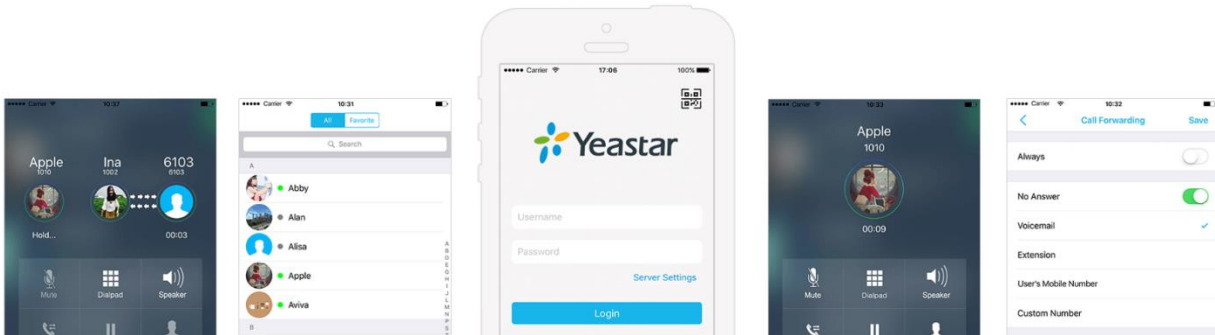

It's highly scalable

Yeastar Cloud PBX is not intended to be a one-size-fits-all solution. Built on latest cloud communications technology, it allows for capacity expansion with just a few clicks. YMP supports max 100 PBX instances, 2000 users and 500 concurrent calls, while each PBX instance supports max 500 users. Distinguish yourself with competitors by providing unparalleled customization and flexibility.

It's totally mobile

The power of Yeastar Cloud PBX extends even further with Linkus Mobile Client, a big plus for the modern agile business. Linkus offers full access of communication features on your mobile phones. And calls will be routed independent of locations to you anywhere, anytime. It's all at your finger tips. Ready to take advantage of a whole new level of freedom and productivity?

It's globally connectable

With Yeastar Cloud PBX, you are able to unify your headquarter with remote offices and a handful of teleworkers, if spanning all around the world, within a single PBX system, giving geographically dispersed employees the same features and continuity as in-house users. Offices on opposite sides of the world can then communicate as if on the same floor of one office building.
